# GLASS RACK

### Wash, transport and store – all in one

- AMERBOX racks are easy to handle with 1,3 cm overlap area and smooth sides. These racks interstack with all racks from major dishrack manufacturers.
- Open inside compartments provide thorough circulation of water and cleaning solutions and promote quick and thorough drying.
- Extremely durable, long lasting polypropylene built to withstand chemicals and high temperatures up to 200°F (93°C).
- Closed external walls are designed for optimum cleaning and storage racks keep finger and contaminants out and reduce risk of breakage and injury.
- Easy to carry, easy to grip handles on all four sides as well as smooth overlapping sides and rounded corners reduce the risk of injury.

## PERFECT WASHING AND SANITARY STORAGE SYSTEM

Glassware stays clean when in storage, therefore no need to re-wash before use. Open outer wall is closed & keeps out pollutions, such as dirty water, viruses, insect and pest, contaminant, dust and dirty hand. Clean glassware would need to be washed again after being polluted, it wastes time and money.

Large perforated bottom facilitates thorough penetration of water and detergent during washing.

### FINGERPRINTS-FREE GLASS

Full-sided rack protects the washed glass against unnecessary touch during storage or transport to destination, which reduces the time needed for additional polishing.

### HEALTH SAFETY

Full-sided rack and extra options, namely upper cover and trolley, assure efficient and safe transport of glass and protect it against pests.

### NO MORE WET FLOOR

Bath is a strong point of the trolley, it collects the water dripping from the glass in the baskets.

### QUICK IDENTIFICATION OF GLASS

Various colors of base rack bottom help quickly identify the type of glass even from a distance, without the need to remove stacked baskets.

### CONVENIENT STORAGE AND TRANSPORT

Suitably shaped edges of rack allow stacking, which reduces the footprint in warehouse and increases packing and transport efficiency.

Easy car and manual transport

Made of polypropylene highly resistant to detergents and high temperature (up to 199°F/+93°C)

**HACCP**

# WAREWASHING SYSTEM

## Choose the correct dishrack:

# 1

Measure the maximum diameter of your glass to determine the number of compartments.

# 2

Measure the maximum height of your glass to the top edge of rim to determine the compartment height.

# 3

To improve work efficiency and easy identity rack content choose one of the colored base rack.

ergonomic handles

various configurations GN containers

# THERMOBOX PROFI LINE

- Perfect for transport of hot or cold products.
- The special heat-sealed inner lining provides reinforcement, facilitates easy cleaning and substantially improves the useful life.
- The thermobox is suitable for containers sizes up to Gastronorm 1/1.
- Expanded polypropylene (EPP) boxes have a sealed structure which provides exceptional insulation, up to 50% better than other thermoboxes.
- Temperature resistant from 4°F to 230°F (-20°C to +110°C).
- Practical integrated handles allow for comfortable carrying.
- The thermoboxes are stackable both with and without lids.

### Thermobox Profi Line

# BEVERAGE CONTAINER

- Insulated drink server
- Ideal for storing, transporting and serving hot and cold drinks
- Four sturdy plastic latches on either side enable easy opening or closing and will never rust
- Drip-proof recessed faucet for easy self-serve access
- Comes with a sticker label set (coffee, decaffeinated coffee, punch, ice tea, hot water, blank) to identity your beverage.

## Temperature retention

### hot

### cold

Vent cap – pressure balance make the container easily open dispensing

1 inch ultra latch – with durable plastic box, no rust

9.5 inch ultra latch – wide nylon latches which are easy to open and close by one hand, no rust

Recessed faucet accommodates larger cups allows even dispensing and eliminates drips. Two position: for continuous pouring and the other for individual dispensing.
